

PresSTORE Backup is the automatic, high-performance backup and restore solution for saving data to tape or disk.

### Easy Administration. Anyplace. Anytime.

PresSTORE's browser-based interface enables fast and simple configuration, administration and monitoring – independent of your location. The first backup can be setup and run within minutes.

### User Restore

The administrator can give user rights to search, browse and/or restore from backup

### Security and reliability

#### Maximum Security

To ensure maximum data security, a backup clone on a second tape can be created for offsite storage and disaster prevention. Encryption options protect your data during transfer and on the media.

#### Interruptible Backup

Interruptions will be filled in automatically with the next run. All partial backups are restorable.

## PresSTORE Backup

Xsan High Performance Tape Backup

**Backup data**

- ✓ Maximum performance
- ✓ Multiple clients and drives
- ✓ Quick restore
- ✓ Interruptible backup

- Maximum security
- Minimum Administration

- Maximum speed
- Full flexibility

### Maximum speed

#### Maximum performance: through Parallelization

PresSTORE Backup supports multiple drives, tasks and clients simultaneously. Large data sets can be backed up in the shortest time possible.

#### Quick restore: Block positioning

PresSTORE's block-direct positioning allows for fast restore because no sequential seeking takes place on the medium.

### Full flexibility

#### Platform independence

Your data can be restored on any platform since PresSTORE stores it in a platform neutral format.

#### Scalable & modular design: Growing with your requirements

There are no limits on possible growth. You can add further PresSTORE products, hardware, media etc. at any time.

## PRESSTORE 4

Operating system requirements	Hardware requirements
<b>Mac OS X</b>	<b>Memory</b>
PPC OSX 10.4+, Intel 10.4+	1 GB+
<b>Windows*</b>	<b>Hard disk</b>
2003, 2008, XP, Vista, Windows 7	200 MB for Installation + variable (for backup/archive indexes)
<b>Linux</b>	
Kernel 2.6.4+ (x86) 32bit or 64bit with 32bit libs	
<b>Sun Solaris</b>	<b>Browser requirements</b>
Sparc Solaris 2.8+, x86 Solaris 2.10+	Safari 4.0+, FireFox 3.5+, Internet Explorer 7+
<b>Platform Bundle</b>	
Mac OS X – Windows – Linux – Sun Solaris	
* Note: Not supported as Backup2Go Server
