ARCHIWARE

Archiware at NAB with record number of partners

Archiware, manufacturer of the data management software suite Archiware P5, is showing the latest product developments at NAB Show in Las Vegas from April 13th – 16th. The list of partners for the show is longer than ever, featuring 27 hardware and software companies.

Munich/Las Vegas, April 2015 – NAB Show in Las Vegas, the most important tradeshow for broadcast and media companies outside of Europe, opens its doors on April 13th. As always, Archiware will present the latest developments in the P5 software suite on their booth SL15113 in South Lower Hall.

Show news include version 5.2 of the P5 suite with 64-bit support, FreeBSD support and new features for search and index, the ArchiveAssistant Add-on for EDL restore, partial restore of image sequences and metadata mapping, and new partnerships including Quantum and Scale Logic.

This year, Archiware will be represented on a record number of 27 partner booths at NAB, in many cases with running installations of the P5 software.
On the Dynamic Drive Pool (DDP) booth SL2725, there will be a dedicated Archiware Workstation for demos including backup and archive to LTO tape. An Archiware representative will be present full time to inform customers and resellers about the advantages of using Archiware P5 with DDP storage products.

"We are very proud to be part of such a great network of partners," says Dr. Marc M. Batschkus, Business Development Manager for Archiware. "The mutual benefit is incredible – our customers can choose their favorite hardware, and our partners can recommend our software knowing that it will complement their product perfectly."

The list of partners includes MAM systems Cantemo, CatDV, FocalPoint Server and eMAM, LTO Tape Storage vendors mLogic, Oracle, Quantum and Spectra Logic, Storage manufacturers Dynamic Drive Pool, Object Matrix, Promise and Sonnet Technologies as well as ATTO, MOG Technologies, ToolsOnAir and many more.
