ARCHIWARE

Archiware & Perifery

Archive and Backup of media files to and from MatrixStore with Archiware P5

Protecting against loss of digital media files is a number one priority. They are the life blood of any company relying on them for revenue generation. Whether they are new files or digital rushes that have just come into the facility, work-in-progress by the editor or media files that require archiving safely – unless multiple copies of content exist, then even a simple failure or mishap can corrupt, or lose altogether, digital media.

Introducing Archiware in conjunction with Perifery A solution designed to protect your media content consists of two components:

Archive and Backup from MatrixStore with Archiware P5.

MatrixStore Benefits:

- ✓ Cost-effective near line disk platform
- ✓ Network attached and high-performance
- ✓ Instant access with 99.999% availability
- ✓ Easy to install, administrate and use
- ✓ Self-healing in event of hardware failure
- ✓ Scalable and easily expandable
- ✓ Can be used for other workflows

P5 Archive Advantages:

- \checkmark Installed and set up in minutes
- ✓ Easy to use web interface
- ✓ Backup and/or Archive solution
- ✓ Windows, Mac, Linux and Solaris
- ✓ Easily scalable
- ✓ Extensible for LTO Tape Drive/Library
- ✓ Fully functional, free 30 day trial

1) **The Policy Mover** – a utility to either back up (copy) or archive (move) media files based on business rules or company policies, from a variety of existing storage platforms. **Archiware P5 Backup** and **P5 Archive** provide this.

2) **Destination** – a storage platform that is the destination of the backup or archive copies of media content. This is MatrixStore from Perifery.
