

Archiware Streamlines Storage Strategies at IBC Show 2026

Archiware, a privately-held company with over 25 years of expertise in data management software, highlights flexible storage strategies at IBC 2026. At booth 7.D13, Archiware showcases its P5 data management platform together with integrations from leading disk, cloud, LTO tape and MAM partners.

Munich/Amsterdam, September 7th, 2026 – Storage scarcity is driving organizations to reassess their storage strategy. Keeping all assets on high-performance storage is becoming increasingly costly. Completed projects and content that is accessed less frequently need to be migrated to less expensive storage. Cyber-security requirements make LTO tape an attractive and cost-effective backup medium.

At this year's IBC Show, Archiware P5 presents its versatility with integrations across disk, LTO tape, and cloud storage, including a range of workflows through the P5 Archive, P5 Backup, and P5 Synchronize modules. P5 protects ongoing production and offers long-term preservation. P5's LTO capabilities protect against cyber risks.

Archiware features integrations with 26 industry-leading partners at IBC 2026. Showcased directly at the Archiware booth is a SYMPLY LTO solution for archive and backup. Featured solutions include Axle AI for AI-driven media management (7.D20), ELEMENTS for storage and workflow solutions (7.B45), Starline NAS and storage solutions (7.D15), and ATTO for connectivity solutions (7.A24). A full list of Archiware's hardware and software partners is available in the IBC Partner Map:

About Archiware

Thousands of media companies worldwide use Archiware P5 to protect their production and assets. The product line includes:

- **P5 Synchronize:** for replication of time-critical data, to ensure high availability.
- **P5 Backup:** to back up server data to disk, tape, and cloud.
- **P5 Archive:** with MAM-like features, migrating data offline to tape and cloud.
- **P5 Archive DLM:** an extension for the P5 Archive module for automated data lifecycle management of archived data between tape, disk and cloud.

All modules can be combined to create multiple-step security concepts to achieve maximum data protection. Archiware P5 secures data to disk, tape, and cloud and has integrations with numerous MAM/DAM/PAM and storage partners. Headquartered in Munich, Germany, Archiware GmbH is a privately held company with over 25 years of experience in data management software and more than 20,000 licenses sold worldwide.
