

Archiware expands P5 Archive integration with ELEMENTS Media Library

Flexible, high-performance archiving to LTO, cloud and NAS

Archiware, a specialist in data management and security solutions, and ELEMENTS announce a new integration to P5 Archive. The integration allows users to archive content directly from the ELEMENTS Media Library interface to LTO tape libraries through Archiware P5 Archive.

The new integration builds on existing support for Archiware P5 agents running on ELEMENTS systems for content backup, bringing P5 Archive capabilities directly into the ELEMENTS Media Library. Users can now manage archiving directly within the Media Library, with the flexibility to archive content to LTO tape, cloud and supported NAS storage. This gives media organizations greater choice in how they store and protect their content.

With the optional P5 Archive DLM (data lifecycle management) module, files can be migrated, replicated, verified and moved between disk, cloud and LTO according to defined policies while making it easier to adapt their archive strategy as storage, security and operational requirements change.

LTO provides a cost-effective solution for long-term media preservation, offering a strong price-per-terabyte ratio, an inherent air gap for cyber resilience and support from multiple vendors. P5 Archive can parallelize tape drive operations to maximize throughput, while multiple LTO drives can be used simultaneously for archive and restore jobs support for LTFS provides vendor-independent access to archived content, while P5 also offers its native archive format as an option. P5 Archive additionally optimizes LTFS performance when working with small files.

P5 Archive can be combined with P5 Backup and P5 Synchronize, providing organizations with a comprehensive approach to protecting, managing and preserving their media content.

The integration represents the next step in the development of ELEMENTS' archiving capabilities and will progressively replace its existing Tape Archive module and dedicated Tape Worker. By leveraging P5, ELEMENTS customers can benefit from a wider choice of archive destinations, scalable performance and lifecycle flexibility.

About Archiware:

Thousands of media companies worldwide use Archiware P5 to protect their production and assets. The product line includes:

- **P5 Synchronize:** for replication of time-critical data, to ensure high availability.
- **P5 Backup:** to back up server data to disk, tape, and cloud.
- **P5 Archive:** with MAM-like features, migrating data offline to tape and cloud.
- **P5 Archive DLM:** an extension for the P5 Archive module for automated data lifecycle management of archived data between tape, disk and cloud.

All modules can be combined to create multiple-step security concepts to achieve maximum data protection. Archiware P5 secures data to disk, tape, and cloud and has integrations with numerous MAM/DAM/PAM and storage partners. Headquartered in Munich, Germany, Archiware GmbH is a privately held company with over 25 years of experience in data management software and about 20,000 licenses sold worldwide. Protect your files and find your solution at www.archiware.com.

**About ELEMENTS:**

ELEMENTS designs high-performance storage and workflow solutions that empower teams to work smarter, faster, and more collaboratively. Bringing its expertise and innovation to a wide range of industries, ELEMENTS combines cutting-edge technologies, AI-powered tools, and seamless integration to streamline complex workflows. With over a decade of experience and a focus on forward-thinking solutions, ELEMENTS enables organizations to transform demanding operations into efficient, connected, and future-ready environments.
