

## All the benefits of LTO Now Available on Desktop

Many media productions, post-production houses and creatives rely on what used to be data center technology and was previously limited to big corporations. MagStor's drives offer Thunderbolt and SAS connection to connect any Mac or PC. Combined with Archiware's P5 Archive, this results in a powerful media archive solution.

MagStor is the world's first Thunderbolt 3 certified LTO tape drive manufacturer. MagStor's drives come in different configurations, ranging from single drive and dual drive, to drives with tray-free hard disk slots. The drives plug into a regular power cable, so that no external brick is required. Depending on capacity requirements LTO-6, 7 and 8 is offered. LTO offers the best durability and price per TB of all media.

Archiware P5 Archive is a long-term storage solution that moves data to disk, tape and the cloud. P5 Archive makes it easy to build a powerful Archive as single source of truth that offers a flexible catalog for browsing and searching. The Archive saves space on costly production storage and preserves media for re-use, referencing and returning customers. As users requirements grow and change, P5's modular design allows for optimal scaling to fit your specific needs.

Combined with P5 Archive, the solution with MagStor is an easy-to-use, robust and scalable solution. Access and configuration via browser make it flexible and offer insight from anywhere. P5 supports all MagStor LTO drives, making it the ideal combination for saving your data.

### Entry Level Archive Solution

Example: 1 Tape = 1 Production. Archive to LTO Tape. Manual or automatic drop folder Archiving. Unlimited tapes can be written using the P5 Archive license. Can be combined with P5 Synchronize, Backup and Backup2Go.

LTO-8	
Speed	up to <b>360 MB/s</b> uncompressed
Capacity	<b>12,0 TB</b> uncompressed
Security	Servo Tracks, Verify, Error Correction, Auto Speed
Lifespan	Certified for <b>30 Years</b>
